

DSX™ PowerStack™
100% All-Natural Tone.

DSX™ PowerStack™

The **DSX PowerStack™** by UltraSound delivers unmatched all-natural acoustic tone in an ergonomically designed high performance “stack” package. The DSX PowerStack pumps out 100 watts of incredibly pure warm tone through its four 8” Mylar coned coaxial speakers which were specially engineered by UltraSound for all-natural acoustic tone reproduction.

The DSX PowerStack has 2 channels, including phantom-powered microphone inputs for each channel. Each channel sports its own volume and active EQ. Additional features include a studio quality DI, effects loop, Extension Speaker Jack, and an additional Aux. Input for Tape/CD. To further enhance the DSX™, the onboard 24-bit digital effects processor produces studio quality reverbs, delays and chorus effects, which can be routed to either or both channels.

CHANNEL-1 is designed for both MIC level (XLR) or Instrument level (1/4”) signals. (The 1/4” TRS Tip/Ring/Sleeve input jack is suited for equipment such as high-impedance microphones, keyboards, and drum machines. It accepts both balanced and unbalanced inputs) (Channel-1 is designed as a generic “flat response” channel which is suitable for any acoustic instrument level or microphone signal)

CHANNEL-2 is designed primarily for acoustic guitar and is equipped with an 18db cut Notch Filter that is used to control resonant feedback and a mid cut SHAPE circuit to eliminate any mid range “quack” from your pickup(s).

UltraSound DSX PowerStack Features:

- Innovative “Stack” design
- Speakers: 4 x 8” (Custom Coaxial Speakers made exclusively for Ultrasound)
- Channels: 2
- Volume Controls: 1 per channel
- Independent active EQ’s for each channel
- XLR & 1/4” Microphone/Instrument input on each channel
- Phantom Power
- RCA Inputs
- Anti-feedback notch filter
- Channel Assignable Digital EFX
- Master volume

- FX loop
- DI Output
- Line Out
- Powerful 100W Power amp
- 24 Bit Studio Quality DSP with 15 Preset Digital Effects

UltraSound DSX PowerStack Specifications:

- Power Output RMS: 100WRMS (50+50)
- Speaker Configuration: 4 x 8” coaxial
- Weight: 49 lbs. Total (26 lbs. + 23 lbs.)
- Dimensions: 26”H x 18”W x 11”D (Stacked) 13”H x 18”W x 11”D (Unstacked)
